Education

University of California, Santa Cruz, *B.S. Computer Science* **Expected June 2028**
GPA: 3.55/4.0, *Dean's Honors List*
Relevant Courses: Machine Learning, Computer Systems & C Programming, Data Structures & Algorithms, Mobile Applications, Software Design Project, Analysis of Algorithms, Python Programming Abstractions, Discrete Math

Skills

AI Tools: Claude Code, Codex, OpenAI Whisper
Languages: Python, TypeScript, JavaScript, SQL, HTML/CSS, Kotlin, Swift
Frameworks & Libraries: React.js, Next.js, React Native, Node.js, Express.js, Bootstrap, Pandas
Databases: PostgreSQL, MySQL, Firebase
Developer Tools: Git, GitHub, Docker, AWS, Jest, Agile/Scrum

Experience

IDX Exchange **Jun 2026 - Sep 2026**
Software Engineer Intern *Remote*

- Built an Express/MySQL backend **serving 53,000 MLS listings** with filtering, pagination, connection pooling, and composite indexes
- Secured property sorting and filtering using parameterized SQL queries and whitelisted columns **across 8 sort combinations**
- Engineered a React property search interface with pagination, photo galleries, and Google Maps integration, **achieving 70% test coverage** across frontend and backend

Selene Odds **Jun 2026 - Sep 2026**
Software Engineer Intern *Remote*

- Integrated Kalshi prediction-market odds into the platform, enabling unified comparisons and **reducing odds-search time by 50%**
- Shipped a full-stack odds browsing interface **organizing 1,000 prediction markets** by category, sport, and event
- Designed an extensible multi-venue pricing model supporting additional sportsbooks and prediction markets without UI schema changes

UCSC Baskin Engineering **Jan 2025 - Mar 2025**
Python Tutor *Santa Cruz, CA*

- Conducted 30 individual and group tutoring sessions covering Python fundamentals, data structures, OOP, and debugging techniques

Projects

Roomie - ***Full Stack Mobile App*** | *React Native, Node.js, PostgreSQL* **Sep 2026**

- Developed a full-stack roommate messaging app in **a 5-person team** using React Native, TypeScript, Express, and PostgreSQL, **leading frontend development** through Git feature branches and pull requests
- Coded a household messaging and chore management system with file sharing, server-side rate limiting, and task completion tracking

ThinkBack - ***AI-Powered Learning Platform*** | *React.js, Node.js, Express.js* **Jan 2026**

- Created an AI learning platform generating real-time study questions and guides from video lectures using React, Node.js and Claude Code
- Implemented WebSockets, OpenAI Whisper transcription, and OCR to process lecture content and generate questions via the Opennote API

UCVibe - ***Campus Review Platform*** | *React.js, Node.js, Firebase* **Apr 2025**

- Launched a React campus review platform **supporting 5 facility types**, user-submitted reviews, and interactive Google Maps markers
- Configured Firebase Authentication and Realtime Database for authenticated review submissions and publicly accessible ratings

UC Admissions Data Explorer - **Data Dashboard** | *Python, Pandas, Plotly* **July 2025**

- **Analyzed 150,000 UC admissions records** spanning 20 years to examine GPA trends, acceptance rates, and demographics
- Programmed an interactive Streamlit dashboard featuring Plotly visualizations and admissions trends **across 10 UC campuses**
